Description of Property

Ridgeway Crystal Beach High School
576 Ridge Road North
Part Lot 23, Concession 2

Statement of Cultural Heritage Value or Interest

Ridgeway Crystal Beach High School was built in 1927, and since that time a number of additions have been constructed. This statement of cultural heritage value or interest is applicable to the original 1927 school building only.

The original school building is well constructed in the classic gothic collegiate/institutional style popular in the early 20th century. It is a symmetrical, 2 ½ storey building, complemented with a centred and recessed main entrance and landing, leading to the classic twin entrance wood doors and frame, topped with an attractive sunrise design transom window which is boldly outlined by a larger cement/stone frame with a double lintel.

The original school building construct was located with a deep setback from Ridge Road, and with a wide curved paved driveway and sidewalk, giving the building a stately and elegant entrance. The red brick masonry exterior, the symmetrically placed windows and the limestone accents combine with the grand front entrance to portray a fine example of the period's educational building style. The central focus of the building design projects from the centre on all levels and provides a grand entrance with a majestic framework of masonry and glass. The window openings are original along with their cement sills and lintels.

The original school was designed by the architectural firm SB Coon & Son of Toronto, the leading school of architect of the period, who designed many prominent commercial, residential and institutional buildings throughout the province around this time. When it was completed in 1927 it dominated the landscape and became a village landmark.

Today, the school is still the largest, tallest and most significant building in Ridgeway and is the only example of this style of building within the Fort Erie community. This landmark is often referred to as 'the biggest little school in Ontario'.
